## (Fund 110 - General Fund)

- A) When the developer submits plans, maps, or other documents for plan review, deposits equal to one half of the total estimated Engineering Improvements and/or Grading Plan Review Fees shall be made to the Engineering Department. The Plan Check Fees are based upon the Engineer's Estimate, which shall also be provided at the time the plans are submitted. The deposit(s) shall be credited toward the final fee(s) as determined at engineering permit issuance based upon the final, approved Engineer's Estimate. The deposit shall be paid to the Engineering Department at the time of the developer's first plan submittal - (revised 2009)
- B) A new three-tiered fee structure is ADOPTED. This will eliminate the previous 8.75% flat fee.
- C) For estimates based on cubic yards of material to be moved, see Engineering Fees chart for alternative calculation.
- D) These costs only represent the Engineering costs. This is a multi-department activity, which will be charged by an hourly rate from all participating departments, which includes salary, benefits and overhead. A deposit may be required prior to beginning the work.
- E) Transportation Permit Fee rate set by State of California in accordance with CVC 35795(b)(1).
- F) The Countywide Construction General Permit for NPDES categorizes construction projects according to three risk levels according to project sediment risk and receiving water risk. Risk Level 1 are those projects issued permits by the Regional Water Quality Control Board prior to July 1, 2010. These projects are subject to minimum Best Management Practices (BMP) and visual monitoring only. Risk Level 2 projects have been determined to present a high sediment risk and low receiving water risk, or, a low sediment risk and high receiving water risk. Risk Level 3 projects have been determined to have both a high sediment risk and high receiving water risk. Risk Level 2 and 3 projects are required to implement BMPs and may be required to conduct sampling of storm water runoff to determine whether sediment and pH levels are within acceptable tolerances. If exceeded, the project site may be subject to more stringent controls and extended monitoring activities. Actual costs include staff time and time and materials for outside expenses. Surplus funds collected to be returned to applicant. Additional deposits may be required.

### G) MAJOR SUBDIVISION MAP PROCESSING FEE

<u>1ST - 3 FINAL MAP CHECKS</u>	<u>4TH Final Map Check</u>
5-50 LOTS \$4,000	\$4,000 + \$800 each additional map check

151 OR MORE \$5,000	\$5,000 + \$1,330 each additional map check

*Note: If an Engineering study is contracted out (i.e., Traffic Study) on behalf of a project applicant, a 25% overhead charge may be used in lieu of staff time being tracked and charged directly.*
